## SUMMARY

IT student at the University of Washington Tacoma (graduating June 2027) with software development internship experience building a Python document-rendering system. Skilled in Python, SQL, and web development, with a focus on data and cybersecurity. Seeking internship and entry-level roles.

## EDUCATION

**University of Washington Tacoma** Expected June 2027
Bachelor of Science in Information Technology
**Relevant coursework:** Programming Fundamentals (Python), Programming Principles (Java), SQL

## EXPERIENCE

**Software Development Intern** | HexaPlus (Seoul, South Korea) June 2026 – August 2026

- Built a Python system that converts structured JSON into consistent HTML, DOCX, and HWPX documents.
- Restructured the architecture to separate shared rendering logic from format-specific exporters for easier maintenance.
- Added support for lists, tables, block quotes, code blocks, hyperlinks, images, and page breaks in all formats.
- Dockerized the app and added a browser-based Web UI so others could test it without installing dependencies.
- Used Git/GitHub for version control, validated output files in ONLYOFFICE, and worked in an international team.

## PROJECTS

**Cybersecurity Incident Analysis** | Personal Project Python, SQL, Pandas, Matplotlib

- Analyzed 10,596 real-world incidents from the VERIS Community Database, cleaning 2,683 columns down to 12 for analysis.
- Loaded data into SQLite, wrote SQL queries, and built four charts on industries, attack types, and impacts.

**Stems & Roses Website** | Client Project Base44

- Contributed to a client website for a relaunching florist: estimate and order requests, order status, admin dashboard.
- Documented requirements, decisions, testing, and client feedback in the final portfolio; client reported satisfaction.

**Zio Autobody Shop Website** | Client Project Wix Studio, Base44

- Designed and built a client website for a local auto body shop with services, gallery, testimonials, and booking.

**CineMood** | Mood-Based Movie Recommendation Site HTML, CSS, JavaScript

- Built a responsive multi-page site with search, a movie carousel, mood-based suggestions, and a review form.
- Saved favorites and reviews with browser localStorage and secured the review form against HTML injection.

## LEADERSHIP

**Event Coordinator, Women in Cybersecurity (WiCyS), UW Tacoma** September 2025 – June 2026

- Plan workshops and events, including Capture the Flag, Threat Landscape 101, and a CS & cyber resume workshop.
- Coordinate guest speakers and hands-on activities that give members practical, career-focused experience.

**Treasurer, Somali Student Association, UW Tacoma** September 2024 – June 2025

- Managed chapter finances and built budgets; partnered with the Regional Executive Board to support events.

## TECHNICAL SKILLS

**Languages:** Python, Java, SQL, JavaScript, HTML, CSS
**Tools & Platforms:** Git/GitHub, Docker, Pandas, Matplotlib, SQLite, VS Code, python-docx, Wix Studio, Base44, technical documentation
**Interests:** Data analysis, web development, cybersecurity, machine learning | **Spoken:** English, Somali (fluent)

## ADDITIONAL WORK EXPERIENCE

**Cashier, Home Depot** May 2025 – June 2026
**Administrative Assistant, A&H Financial Service** May 2024 – September 2024
**Dispatcher, Sahal Dispatch LLC** October 2023 – May 2024
**Barista, Starbucks** June 2022 – September 2023
